Preface p. vii
A Quick Introduction to Complex Analysis with Applications p. 1
The quickest introduction to complex analysis p. 1
Complex number system p. 7
Power series and Euler's identity p. 10
Power series p. 10
Euler's identity p. 12
Laurent expansion, residues p. 18
Residue calculus p. 20
Cauchy integral formula and its consequences p. 27
Review on vector-valued functions p. 28
Differentiation p. 28
Fluid mechanics p. 30
Thermodynamic intermission p. 31
Cauchy-Riemann equation p. 33
Inverse functions p. 40
Around Jensen's formula p. 45
Residue calculus again p. 47
Partial fraction expansion p. 60
Partial fraction expansions for rational functions p. 60
Second-order systems and the Laplace transform p. 61
Examples of second-order systems p. 61
The Laplace transform method p. 62
Partial fraction expansion for the cotangent function and some of its applications p. 67
Robust controller for servo systems p. 73
Prerequisites p. 74
A generalized Nevanlinna-Pick interpolation problem p. 75
Proof of Theorem 1.23 p. 80
Another statement p. 82
Paley-Wiener theorem p. 83
Bernstein polynomials p. 84
Time-limited polynomial extrapolation p. 84
Some far-reaching principles in mathematics p. 85
Applicable Real and Complex Functions p. 89
Preliminaries p. 89
Algebra of complex numbers p. 92
Algebraic preliminaries and embeddings p. 92
Complex number system p. 96
Power series again p. 107
Limes principals p. 107

Radius of convergence p. 109
Function series p. 110
Improper integrals* p. 114
Differentiation* p. 120
Computation of definite integrals* p. 121
Line integrals and Green's formula* p. 124
Cauchy integral theorem p. 125
Cauchy integral formula p. 130
Taylor expansions and extremal values p. 132
Taylor expansions for real functions* p. 132
Taylor expansion p. 134
Extremal values* p. 135
Laurent expansions p. 141
Differential equations p. 144
The logarithm function* p. 144
Autonomous DE p. 145
First-order reaction p. 145
System of reactions p. 148
Other reactions p. 150
Poisson distribution p. 151
Decay of radio-active substances p. 152
Inverse functions p. 154
Inverse trigonometric functions* p. 154
A. Gaudi and the catenary curve p. 156
Rudiments of the Fourier transform p. 158
Paley-Wiener theorem and signal transmission p. 163
Fourier analysis again p. 164
Restoration of signals p. 167
Appendix p. 169
Integration* p. 169
Integration by parts and change of variables p. 172
Multiple integrals* p. 175
Answers and hi it Is p. 179
Bibliography p. 187
Index p. 191
