Harvard students Zoe and Jack find themselves propelled into the intoxicating biotech startup world when they announce they've discovered the cure for ageing. Zoe, the daughter of an MIT professor who grew up in her brother's shadow, can envision her future anew at Harvard University. Jack, a boy in Zoe's organic chemistry class with unruly hair and a gleam of competitiveness, matches her intellect and curiosity with every breath. When Jack refers Zoe for a position in a prestigious professor's lab, the two become entwined as colleagues, staying up late to discuss scientific ideas. They find themselves on the cusp of a breakthrough: the promise of immortality through a novel anti-ageing drug. Zoe and Jack set off on their new project in secret. Finding encouraging results, they bring their work to an investor, drop out of Harvard, and form a startup. But after the money, the magazine covers, and the national news stories detailing their success, Zoe and Jack receive a startling accusation that threatens to destroy both the company they built and their partnership.

🔥 Why Everyone is Obsessed
